About US

Mike n Dad Engineers and Contracting is a best-in-class integrated engineering contracting solutions provider. We are distinct and distinguished in the EPC Engineering, Procurement & Construction services domain.

We are familiar with the current International Building Code (IBC) requirements, as well as provisions of earlier versions and model building codes. Our engineers take an active participation in their fields of expertise, maintaining affiliations in various professional and technical societies. We endeavor to provide our clients with innovative, safe, cost effective and quick to build solutions to their structural problems. Utilizing the latest construction techniques polices and best practices in the design and construction of their projects, offers its clients an excellent services throughout U.A.E, Somalia and Pakistan.

Mike n dad Engineers and Contracting is striving to be known as the most trusted and reliable partners for all of our stake holders. We must place our values at the highest level which are based on honesty, trust and reliability. These values would never be compromised.

Mike n Dad Engineers and contracting team is committed to delivering tangible outcomes which add value to infrastructure and urban development projects throughout Middle East. We believe that our success lies in our commitment to understanding and meeting our client's requirements for safety, on-time delivery, value of money and workmanship.

Organisation Chart

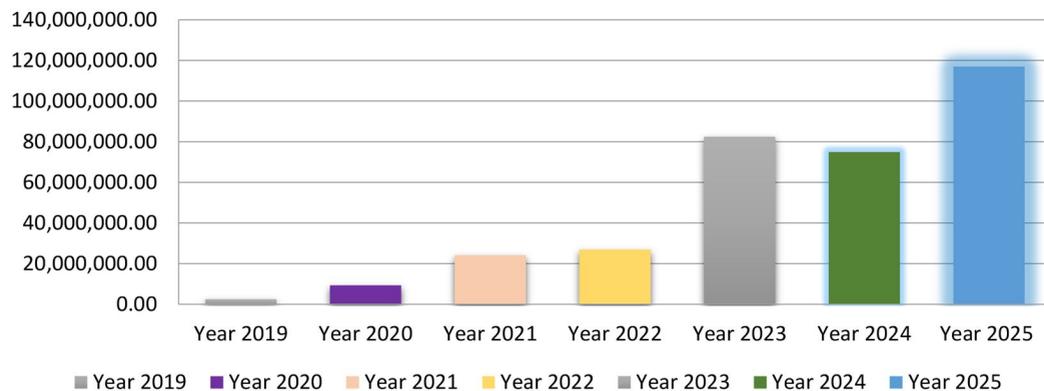

FEED

Front-end engineering and design

• Front-end engineering and design is the work required to produce quality process and engineering documentation of sufficient depth, defining the project requirements for detailed engineering, procurement, fabrication and construction of facilities and supporting a ± 10 percent project cost estimate. This distinct project phase is typically used to:

- Conduct hazardous operations reviews
- Evaluate options that will improve the return on assets (ROA)
- Prepare cost estimates for scope definition and for project funding
- Support internal funding requirements
- Thermal rating of heat exchangers.
- Preparation of tender packages for the main equipment.
- Development of process and utility Piping and Instrument Diagrams released for detail engineering.
- Development of detailed plot plans and hazardous areas.

Business Growth last Seven years- AED

Detailed Engineering

Detailed engineering is about turning concepts into constructible designs, efficiently and cost-effectively. The benefit we bring to a client is our experience, with a service that is tailored to the individual project, covering both design-supply and design-build situations.

Detailed engineering is a systematic progression – from process design and selection of mechanical equipment, to sizing of control equipment, definition of electrical supply requirements and eventually, civil and structural design. It is essential that each stage is sufficiently defined before information is passed on to the next discipline.

This strategy optimizes the cost of engineering and is vital for purchasing equipment.

Value Engineering

MIKE N DAD is committed to providing an extensive range of Value Analysis and Value Engineering (VAVE) services that complement our complete end-to-end supply chain, design and manufacturing strategy. VAVE is a structured process of performing a detailed analysis of our customers' products that enhance the value of key design elements. This process improves the overall product value, re-newing product features and decreasing the cost.

Our design and engineering teams bring value to the product development process, working at virtually every stage of the design cycle: from concept through detailed design and prototyping to volume production and end-of-life support.

Our processes are fully integrated into our Whole Life Costing procedures and Change Management procedures to ensure that all of the implications of VM / VE decisions are fully evaluated and understood and that they deliver value not only terms of in initial capital cost but also in on-going operational / lifecycle costs.

Our Cost Consultants are supported by specialist VM / VE practitioners from our Advisory Services team to provide clients with a complete and high quality service.

Construction of Oil Storage Terminal and WareHouse

Berbera Edible Oil Terminal Design and Build.

Berbera Port, Somaliland.

10 Million USD

2024-2025

- Fabrication of oil storage tanks and warehouse.
- Erection of oil storage tanks and warehouse.
- Civil Work including buildings and foundation.
- Firefighting System.
- Labour supply.
- Supply of Heavy Machines.
- Equipment.
- Consumables

Construction of Oil Storage Terminal Facility

Design, Supply, Construction, Installation, Testing, Commissioning and Handing Over of a Fuel Terminal.

Berbera, Somaliland.

20 Million USD

2023-2025

- Fabrication of oil storage tanks and warehouse.
- Erection of oil storage tanks and warehouse.
- Civil Work including buildings and foundation.
- Firefighting System.
- Labour supply.
- Supply of Heavy Machines.
- Equipment.
- Consumables

Construction of Oil Storage Terminal Facility

Design, Supply, Construction, Installation, Testing, Commissioning and Handing Over of a Fuel Terminal.

Berbera, Somaliland.

4.0 Million USD

2022-2023

- Fabrication of oil storage tanks and warehouse.
- Erection of oil storage tanks and warehouse.
- Civil Work including buildings and foundation.
- Firefighting System.
- Labour supply.
- Supply of Heavy Machines.

- Firefighting System.
- Labour supply.
- Supply of Heavy Machines.
- Equipment.
- Consumables
- Internal Pipeline

Offshore

Construction of Offshore Facility

Design, Supply, Construction, Installation, Testing, Commissioning and Handing Over of Offshore Equipment.

Berbera, Somaliland.

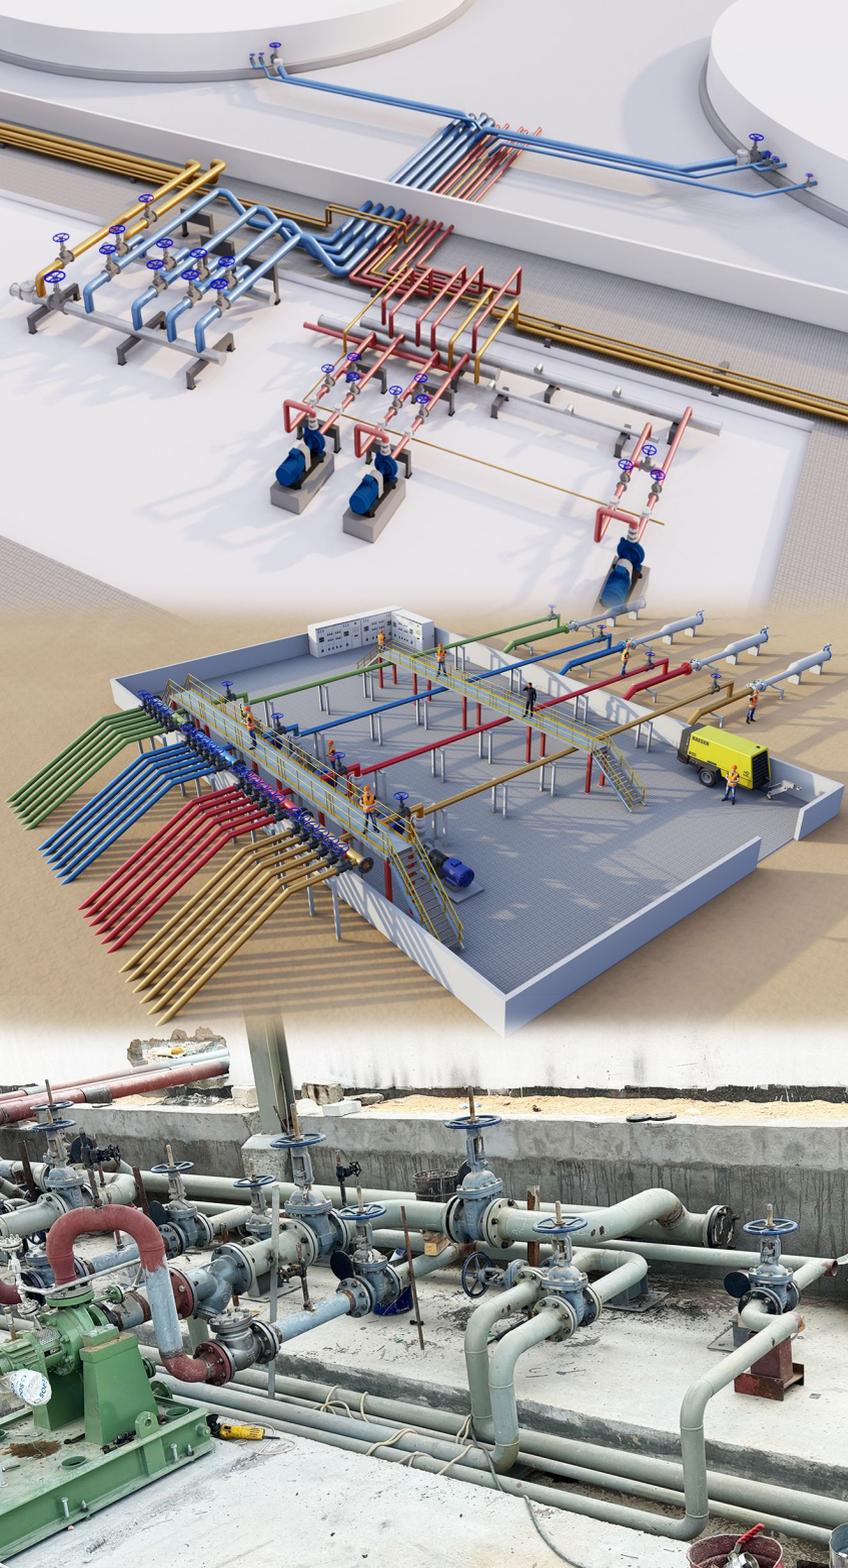

4.8 Million USD

2023-2024

- Fabrication of Steel structure and steel plates.
- Erection of oil storage tanks and offshore structure.
- Civil Work including foundation.
- Firefighting System.
- Labour supply.
- Supply of Heavy Machines.
- Equipment.
- Consumables
- Internal Pipeline

Pipeline

Construction of Internal and External Pipeline.

Design, Supply, Construction, Installation, Testing, Commissioning and Handing Over of Pipeline Projects.

Berbera, Somaliland, Saudia Arabia and United Arab Emirates.

2.8 Million USD

2022-2025

- Fabrication of Pipeline.
- Erection of Pipeline.
- Civil Work including foundation.
- Firefighting System.
- Labour supply.
- Supply of Heavy Machines.
- Equipment.
- Consumables
- Internal Pipeline

Road Tanker & Trailers

Design, Supply, Construction, Installation, Testing, Commissioning and Handing Over of Road Tankers and Trailers.

Berbera, Somaliland, Saudia Arabia and United Arab Emirates.

250,000 USD

2022-2025

- Fabrication of Strcture and Steel Plates.
- Erection.
- Labour supply.
- Supply of Heavy Machines.
- Equipment.
- Consumables
